

## OVERHANGING HEDGES AND TREES

Can you help please?

Throughout the village hedges and trees have gained considerable foliage and with the warm and wet weather, we have recently had, are growing well. Because of this growth some of them are encroaching onto and hanging over the footpaths at the edges of your properties.

Some are causing an obstruction and, in some cases, making people step into the road to avoid them, and as you can imagine, our local wheelchair users find it very difficult to negotiate the paths in safety.

Would you please be kind enough to cut back any hedges or low hanging branches that may be invading the footpaths. This would be very helpful and much appreciated.

Swanland Parish Council thank you in anticipation of your assistance in this matter.
